Our Story

Founded in the early 1990s by Mr. **Rajinder Makhija**, our group began with **antenna wires** and **coaxial cables**. Over the years, we expanded our product line to include **networking cables**. In 2018, we achieved a major milestone by establishing a **state-of-the-art Optical Fibre Cable Manufacturing plant** in New Delhi, India. Today, we are a reputed manufacturer of **Optical Fibre Cables**, **FRP Rods**, and **HDPE**, known for our quality, reliability, and cutting-edge technology. With a combined annual capacity of over **250,000 kilometers**, we are pioneers in the field of telecommunication and broadband solutions.

(Awarded as **Best Cable Manufacturer** presented by Hon'ble Dy. Mayor of Delhi in Partnership with **The Economic Times**.)

(The **Pride Award** presented by **The President of All India Electronics Association Estd. 1936**)

Meet the Team

Mr. Rajinder Makhija has been leading the **company's group** since the early **1990s**. Under his guidance, the company diversified from **antenna wires** to **Co-axial cables**, **CCTV cables**, **Networking Cables** (CAT-5 and CAT-6), and **Optical Fibre Cables**. His emphasis on **backward integration** ensures **quality** and **competitive prices** through **in-house production** of most raw materials.

Mr. Sudhir Makhija, Director of **M-Core Industries Pvt. Ltd.**, is a successful **business leader**, **published author**, and a **Dealer Growth Expert**. With a proven track record in **strategic management**, he drives growth, fosters collaboration, and excels in **market expansion** initiatives that benefit dealers through **strategic partnerships**. Skilled in assembling **top-performing** teams, he cultivates a culture of **teamwork** for **success**.

Mr. Rahul Makhija, a proficient Director at **M-Core Industries Pvt. Ltd.**, leads in **production**, **operations**, and **cost-cutting measures**, **propelling growth** and **efficiency**. His expertise guarantees **top-quality products** and profitability, with remarkable achievements in scaling economies and optimizing **product efficiency**.

Testimonials

“ We are proud **Channel Partners** of **M-CORE**. Working with them has led to a remarkable **10X increase in our Cable Business profits**, thanks to their invaluable **support** over the past **12 years**. ”

Mr. Bharat Ramoliya - IR Focus CCTV, Surat

“ **CCTV Installations** mein **M-Core** ki cables use karne se mere **service visits 50% kam** ho gayi hain, **jis se mera PROFIT 30% badh gaya hai** ”

Mr. Sahil, CCTV Installer (Delhi)

“ Agar **jyada se jyada earning** karni h aur apne customer ko **achhi se achhi quality** dekar khushh rakhna hai to **M-core** se **judiye or paisa kamaiye**. ”

Md. Salim - M.S. Enterprises (Ayodhya)

Decoding CCTV Cables:

7 KEY FACTORS FOR SUCCESSFUL CCTV INSTALLATION

CCTV cables are a critical component of any surveillance system setup. They are the conduit through which video signals are transmitted from the cameras to the recording device or monitor. Here's some **key factors** about CCTV cables for dealers and installers:

1. TYPES OF CCTV CABLES:

CCTV installations mainly use **Co-axial (3+1 / 4+1 / 2+1)** or **Networking (Cat5/Cat6)** cables. Co-axial cables suit **analog systems**, while Networking cables are for **IP-based systems**. There are various types of CCTV cables available in **M-Core** brand which can be used in different - different applications depending upon the distance from CCTV camera to DVR recorder.

Co-axial (3+1 / 4+1 / 2+1) Cables

Networking (Cat5/Cat6) cables

2. UNDERSTANDING CCTV CABLES:

RG59, RG6 Co-axial cables, and **3+1/4+1/2+1** are common CCTV cables. RG59 is most suitable for analog systems, while **RG6** is preferred for **high-definition** and **long-distance applications**.

Analog HD Camera

RG6 Co-axial Cable

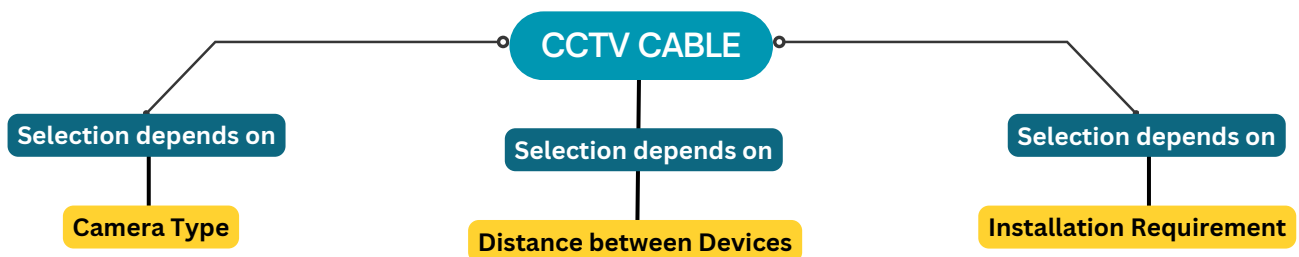

3. NETWORKING CABLES FOR IP CAMERAS:

Cat5e and **Cat6** cables carry video, audio, and power (via PoE - Power over Ethernet) over a single line, simplifying installation. **Cat6** is suitable for systems with high-resolution cameras or extensive network traffic.

4. CHOOSING THE RIGHT CABLE:

Selection depends on **camera type**, **distance** between devices, and installation **environment**.

5. SIGNAL AND POWER SOLUTIONS:

Signal boosters and **baluns** help maintain **signal quality** over **long distances**. Power over **Ethernet** (PoE) simplifies power delivery for **IP cameras**.

Signal Booster

Baluns

6. ENVIRONMENTAL CONSIDERATIONS:

Outdoor cables should be **weatherproof** and **UV resistant**. In potential electromagnetic interference (EMI) areas, shielded cables are beneficial.

Underground

Waterproof

UV Resistant

7. Cable Testing & Future-Proofing Installation:

Each cable should be tested for **signal quality** using appropriate tools after installation. **High-quality cables** support future upgrades. Proper **installation** prevents performance **degradation** and reduces customer re-visits.

Understanding **these aspects** helps dealers and installers optimize **CCTV installations** and troubleshoot common issues.

Our Portfolio

CCTV CABLE

CCTV cables play a vital role in surveillance systems, serving as the essential pathway for transmitting video signals from cameras to recording devices or monitors. Here's some transformative content about **CCTV cables for dealers and installers**:

Range of CCTV Cables:

CCTV installations mainly use Co-axial (3+1 / 4+1 / 2+1) or Networking (Cat5/Cat6) cables. **Co-axial cables** suit analog systems, while **Networking cables** are for IP-based systems.

M-Core 3+1/4+1/ 2+1 CCTV Co-axial Cable:

Range of CCTV Cables

NETWORKING CABLE

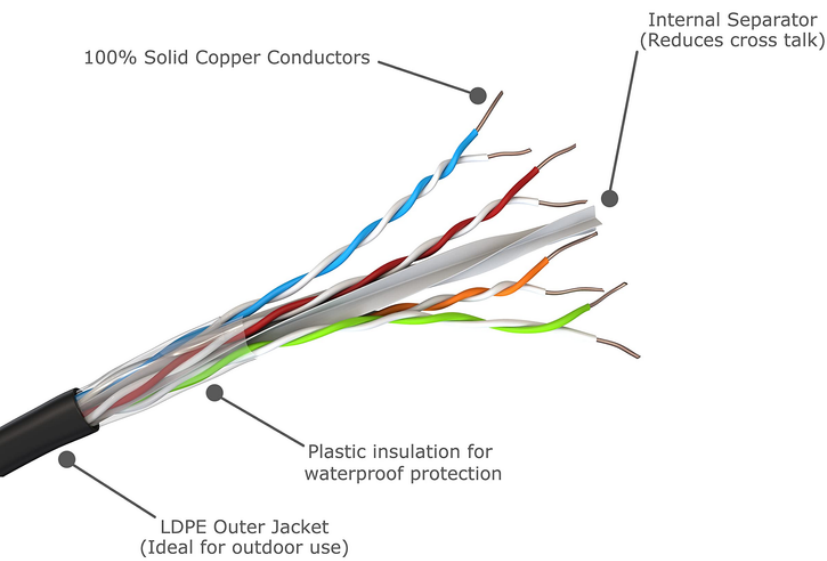

Networking Cables (CAT-5 / CAT-6) are twisted pair cables for carrying signals. These cables are used in Structured Cabling for computer networks / Ethernet or running more than one camera over a single cable with use of some accessories like passive balun/transceiver etc.

Range of Networking Cables:

- M-CORE CAT-5 2 PAIR CABLE
- M-CORE CAT-5 4 PAIR CABLE
- M-CORE CAT-6 CCA CABLE
- M-CORE CAT-6 COPPER CABLE
- M-CORE CAT-6 OUTDOOR CABLE

To Know more about us

21 REASONS TO CHOOSE M-CORE CABLES

1. **High-quality image** transmission
2. **Long-distance signal transmission** without degradation
3. Exceptional **durability** for withstanding harsh conditions
4. Resistant to **electromagnetic interference**
5. **Easy installation process**
6. **Versatile usage** in various settings
7. Compatibility with a **wide range of devices**
8. **High bandwidth** for efficient **data transfer**
9. Low signal loss over **extended distances**
10. **Cost-effective** in the long run due to reliability
11. **Reliable** and **steady connection** for uninterrupted surveillance
12. Support for **advanced security** features for **enhanced protection**
13. **Future-proof technology** to adapt to evolving needs
14. **Wide variety of lengths available** for flexible installations
15. **High-speed data transfer** for real-time monitoring
16. **Noise reduction capabilities** for clear signal transmission
17. Suitable for **multiple applications**, including CCTV and networking
18. **Assured quality** with **warranties** and **guarantees**
19. **Environmentally friendly** materials used in manufacturing
20. **Improved overall system performance** for optimal results
21. **Trusted** and **preferred by industry professionals** for its **reliability**.
